

2024 Statement of Qualifications

Renewable Energy Engineering Services

Leading the solar industry with
over **17GW** of engineered plants

Elara Solar
Pearsall, Texas
130MWAC

Company Overview

Blymyer Engineers has delivered multidisciplinary engineering services to industrial and commercial clients worldwide since 1961.

A 60-year track record of success.

We have been active in commercial and utility-scale solar power projects since 2003, including utility, agricultural, educational, municipal, and commercial applications.

We completed our first commercial PV project in 2004. Since then, we have designed well over 17GW of ground-mounted fixed and single-axis tracker systems as well as canopy-mounted and roof-mounted systems for utility, agricultural, educational, municipal, and commercial applications. We offer the following:

Specialized knowledge

In-house engineers licensed in over 43 states and a contracting affiliate with A, B, and C-10 licenses. Unparalleled experience with California Division of the State Architect. Multiple designs with precheck approval.

Understanding PV economics, including up-front and long-term costs

We'll find the balance that is right for your project. We can identify alternatives that save time and money.

Optimized system performance

Best practices for site evaluations, production modeling, layout, balance-of-system engineering, racking, tracking, foundations, conduit and wire management, and performance monitoring to maximize your production.

Excellent relationships

Strong relations with vendors, utility representatives, permitting authorities, developers, EPC contractors, and integrators facilitate the smooth completion of your project.

Choose Blymyer Engineers for end-to-end renewable engineering services

Solar

EV charging

Energy storage

Wind

Substations

Renewable Energy Engineering Services

On projects ranging in scope from a simple site inspection or structural review to design of an entirely new facility, we offer assistance at each stage: preliminary site selection and feasibility analysis, conceptual design, detailed design, permitting, construction, and start-up. Our services include:

Solar power engineering

Electrical engineering

Structural engineering

Mechanical engineering

Total project management

Project planning and scheduling

Cost estimating

Constructibility review

Value engineering

Construction management

Preliminary site selection

Feasibility study

Energy modeling

Production analysis

Regulatory review

Permitting

Contractor prequalification

Bidding and bid analysis

Contract administration

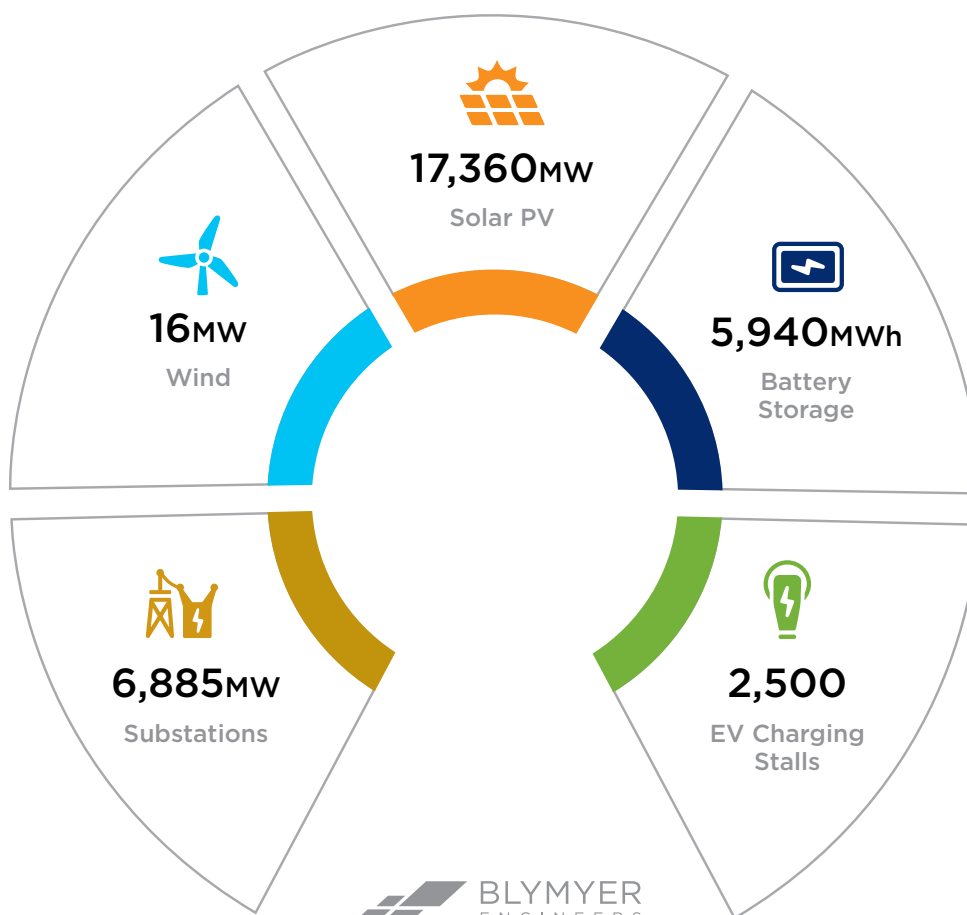

Equipment procurement

Largest solar portfolio in the United States

Leading the solar industry with over **17GW** of engineered plants

Renewable Energy Engineering

Updated August 2023

Engineering leader for renewable projects worldwide

Blymyer Engineers completed its first solar project in 2003. Outpacing the industry, we've engineered more than 17GW since then. That represents a significant part of the United States total solar capacity. Clients choose the Blymyer team for our experience.

Working around the clock for you,
Blymyer Engineers is licensed in 43 states.

Electrical | Mechanical | Structural | Civil | Environmental

Our European office includes skilled engineers who support all of our U.S. and international projects so we can deliver exceptional service around the clock.

Representative Partners and Clients

SUNPOWER®

Blymyer Engineers is actively involved with these leading industry associations

Exceptional service around the clock

Blymyer Engineers is an innovative leader in engineering design for renewable energy projects across the country and around the world.

Our staff—your project partners

Dedicated and passionate about our work, Blymyer's engineers provide clients with exceptional quality service and results. Our engineers are licensed in 43 states. Longstanding relationships with architects, developers, commercial and industrial clients, and renewable energy companies across the United States allow us to maximize efficiency and ensure reliable outcomes.

 **17GW** of Engineered Solar Plants
Largest Solar Portfolio in the United States

Renewable Energy Engineering—Services

Solar

Excellence in Solar Engineering —
On the forefront of solar technology
with hundreds of projects in
43 states and 5 countries.

Wind

Providing a full range of engineering
services from feasibility studies to
complete design and permitting.

Energy Storage

Powering the future with Battery Energy Storage Systems
(BESS) and amplifying the benefits of renewable energy
generation.

Substation

Blymyer Engineers delivers a full range of substation
design and engineering services for standalone or
microgrid substations.

EV Charging

Delivering end-to-end EV Charging
design and engineering with an
experienced team.

Engineering a more Sustainable World

Choose Blymyer Engineers for end-to-end renewable engineering services

Blymyer Engineers brings solar, storage, substation, EV charging, and wind projects from analysis and feasibility studies through engineering design and construction.

Our multidisciplinary firm includes electrical, mechanical, structural, environmental, and civil engineers versed in all aspects of renewable energy engineering.

Meticulous attention to detail and unparalleled customer service offer clients peace of mind and confidence in successful outcomes. Staying in the forefront of a rapidly growing and changing industry, Blymyer is creating a more sustainable world with technologically advanced solutions.

Utility-Scale Solar—Services

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Feasibility studies
- Energy analysis/modeling
- Conceptual design
- Design development
- Cost estimates
- Construction documentation
- Project management
- Construction management
- Commissioning

THE VALUE OF VISION AND EXPERIENCE:

- Specialized knowledge
- Understanding of energy economics, including up-front and long-term costs
- Optimized design and highest-quality installation

Utility-Scale Solar (SAMPLE PROJECTS)

Taygete 1 & 2 | Pecos County, Texas | 500MW

Muscle Shoals | Colbert County, Alabama | 227MW

Prospero 1 & 2 | Andrews, Texas | 550MW

Red Hills Solar Power Plant | Parowan, Utah, 80MW

Elara Solar | Pearsall, Texas | 130MW

Hunter | Utah | 100MW

Utility-Scale Solar (SAMPLE PROJECTS)

Oberon 1 & 2 | California | 500 MW

**Springbok I and II Solar Plants |
Kern County, CA | 258MW**

**SMUD: McKenzie, Kammerer, Bruceville,
and Dillard | 69MW**

Eland, California City, CA | 200MW

**RE Barren Ridge | Kern County, CA |
60MW**

Red Horse Solar | 55MW

Utility-Scale Solar (PARTIAL LIST)

Ash Creek	Texas	408MW	Electrical and Structural Engineering, Substation Design	2023

DSA Solar—Services

Merritt College, Oakland, California, 1.2 MW

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Initial feasibility studies
- Energy modeling and analysis
- Conceptual design
- Design development
- Detailed cost estimates
- Construction documentation
- Permitting
- DSA approvals
- Project management
- Construction management
- Design/build
- Commissioning

MULTIDISCIPLINARY ENGINEERING SERVICES

Blymyer Engineers has designed over 60 MW of solar projects for California schools. Since 2008, Blymyer has installed prechecked canopies at over 300 school sites in California. Our 5th-generation, prechecked canopy design meets all current DSA requirements and offers you the following advantages:

- Rapid permitting
- Lower costs
- Design for all soil, seismic, and wind conditions
- Prechecks include options for T and L structure designs
- Flexibility to accommodate any available modules

DSA Solar (SAMPLE PROJECTS)

Pinole Valley High School | 418kW

**Lancaster Unified School District |
23 schools, CA | 5.5MW**

**San Jose Unified School District |

EV Charging—Services

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Initial feasibility studies
- Energy modeling and analysis
- Conceptual design
- Design development
- Detailed cost estimates
- Construction documentation
- Permitting
- Project management
- Construction management
- Design/build
- Commissioning

EV Charging Stations (SAMPLE PROJECTS)

Tesla Gateway 101 | East Palo Alto, CA

Tesla Alameda South Shore Center | Alameda, CA

EVgo Pacific Avenue | San Francisco, CA

Tesla City Center | San Francisco, CA

Tesla Firebaugh | Firebaugh, CA

EVgo | Walnut Creek, CA

EV Charging Station (PARTIAL LIST)

EVgo	California	70 Stalls	Electrical and Structural Engineering	2023
EVgo	California	360 Stalls	Electrical and Structural Engineering	2022
EVgo	Texas	18 Stalls	Electrical and Structural Engineering	2022
EVgo	Arizona	42 Stalls	Electrical and Structural Engineering	2022

Pioneer Solar, Adams County, Colorado, 88.8 MVA, 34.5/115 kV

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Feasibility studies
- Site assessments
- Conceptual design
- Design development
- Detailed electrical design
- Cost estimates
- Detailed structural design
- Construction/permitting
- Project management
- Construction management
- Commissioning process

Substations (SAMPLE PROJECTS)

Central 40 | CA |
52.5 MVA, 34.5/115kV

Alabama Solar A | AL |
90 MVA, 34.5/115kV

Mount Signal 2 Solar | CA |
165 MVA, 34.5/230kV

Pioneer Solar | CO |
88.8 MVA, 34.5/115kV

Muscle Shoals Solar | AL |
250MVA, 34.5/161kV

Aquamarine | Stratford, CA |
34.5/230kV and 320MVA

Substations (PARTIAL LIST)

Ash Creek	Oklahoma	34.5/345kV	408.85MVA	2023
Choctaw	Oklahoma	34.5/138kV	100MVA	2023
Kiowa	Oklahoma	34.5/138kV	100MVA	2023
El Dorado	Illinois	34.5/138kV	150MVA	2023
Heartwood	Mississippi	34.5/138kV	150MVA	2023
Long Lake	Arkansas	34.5/230kV	200MVA	2023
Show Me State	Missouri	34.5/345kV	250MVA	2023
Bottleneck	California	34.5/69kV	80MVA	2022
Superstition	Arizona	34.5/230kV	90MVA	2022
Vikings	California	34.5/230kV	129.6MVA	2022
Wildflower	Mississippi	34.5/230kV	100MVA	2022

BEI Construction

A Sister Company Of Blymyer Engineers

If and when our clients require design/build services, Blymyer Engineers will work with BEI Construction, our affiliated firm, to provide turnkey services. BEI Construction is a California-licensed general building, engineering, and electrical contractor holding A, B, and C-10 licenses.

During the design/build process, we address design and construction questions early in the conceptual design phase to provide our clients with a seamless project. This relationship also results in BEI Construction's ability to offer services most construction companies cannot, including:

- Renewable: Solar/PV and Wind
- BESS/Energy Storage
- Data and technology infrastructure
- Audio/Visual
- Security
- Permit/Construction Management
- Electrical Contracting

Exceptional work across a range of disciplines

The BEI Construction/Blymyer Engineers team, in addition to having solar expertise, has extensive experience providing design and design/build projects, including data center and head-end design as well as co-locations, battery back-up systems, back-up generators, and more. We have prepared room and building layouts, electrical design (both AC and DC systems), mechanical design, permitting, construction phase services, and as-builts.

Blymyer Engineers — Director of Engineering

From the Director of Engineering

Step into the future of renewable energy with our pioneering company. At Blymyer Engineers, we have revolutionized the renewable landscape, enabling businesses and communities worldwide to harness the power of the sun and wind for a sustainable and clean energy future.

Our team of engineers are industry experts that bring a wealth of knowledge and experience to every project. We stay abreast of the latest technological advancements, incorporating cutting-edge innovations into our designs to enhance efficiency, streamline operations, and maximize energy output. When you partner with us, you gain access to a wealth of expertise that will give you a competitive edge in the market.

Our impressive portfolio of 17GW of engineered plants is a testament to our ability to deliver large-scale projects that exceed expectations in terms of efficiency, reliability, and environmental impact. We have successfully completed projects across diverse industries, from commercial and industrial installations to utility-scale power plants. Our clients trust us to deliver results that exceed their expectations, and we take pride in forging long-lasting partnerships built on trust, reliability, and shared success.

So, if you're ready to join the renewable revolution and unlock the full potential of renewable energy, look no further than Blymyer Engineers. With our unrivaled experience, innovative solutions, and dedication to sustainability, we are the ideal partner to help you harness the power of the sun and wind and drive your organization towards a brighter and greener future. Get in touch with us today and let's embark on this transformative journey together.

Greg Mazur, P.E.
Director of Engineering

Founded in 1961, Blymyer Engineers has over 60 years of experience that is dedicated to your success.

Optimizing design for fast, economical installation.

We work around the clock for you.
