

2026 Statement of Qualifications Renewable Energy Engineering Services

Leading the renewable energy industry
with over **30 GW** of engineered solar

Harquahala
Tonopah, Arizona

450 MW
Solar

1.2 GWh
Energy Storage

Company Overview

Blymyer Engineers has delivered multidisciplinary engineering services to industrial and commercial clients worldwide since 1961.

A 65-year track record of success.

We have been active in commercial and utility-scale solar power projects since 2003, including utility, agricultural, educational, municipal, and commercial applications.

We completed our first commercial PV project in 2003. Since then, we have designed well over 30 GW of ground-mounted fixed and single-axis tracker systems as well as canopy-mounted and roof-mounted systems for utility, agricultural, educational, municipal, and commercial applications. We offer the following:

Specialized knowledge

In-house engineers licensed in over 46 states and a contracting affiliate with A, B, and C-10 licenses. Unparalleled experience with California Division of the State Architect. Multiple designs with precheck approval.

Understanding PV economics, including up-front and long-term costs

We'll find the balance that is right for your project. We can identify alternatives that save time and money.

Optimized system performance

Best practices for site evaluations, production modeling, layout, balance-of-system engineering, racking, tracking, foundations, conduit and wire management, and performance monitoring to maximize your production.

Excellent relationships

Strong relations with vendors, utility representatives, permitting authorities, developers, EPC contractors, and integrators facilitate the smooth completion of your project.

Choose Blymyer Engineers for end-to-end renewable engineering services

Renewable Energy Engineering Services

On projects ranging in scope from a simple site inspection or structural review to design of an entirely new facility, we offer assistance at each stage: preliminary site selection and feasibility analysis, conceptual design, detailed design, permitting, construction, and start-up. Our services include:

Solar power engineering

Electrical engineering

Structural engineering

Mechanical engineering

Total project management

Project planning and scheduling

Cost estimating

Constructibility review

Value engineering

Construction management

Preliminary site selection

Feasibility study

Energy modeling

Production analysis

Regulatory review

Permitting

Contractor prequalification

Bidding and bid analysis

Contract administration

Equipment procurement

Largest solar portfolio in the United States

Leading the renewable energy industry
with over **30 GW** of engineered solar.

 **BLMYER**
ENGINEERS

Renewable Energy Engineering

Updated September 2026

Engineering leader for renewable projects worldwide

Blymyer Engineers completed its first solar project in 2003. Outpacing the industry, we've engineered more than 30 GW since then. That represents a significant part of the United States total solar capacity. Clients choose the Blymyer team for our experience.

Working around the clock for you,
Blymyer Engineers is licensed in 46 states.

Electrical | Mechanical | Structural | Civil | Environmental

Our European office includes skilled engineers who support all of our U.S. and international projects so we can deliver exceptional service around the clock.

Representative Partners and Clients

SUNPOWER®

Blymyer Engineers is actively involved with these leading industry associations

Exceptional service around the clock

Blymyer Engineers is an innovative leader in engineering design for renewable energy projects across the country and around the world.

Our staff—your project partners

Dedicated and passionate about our work, Blymyer's engineers provide clients with exceptional quality service and results. Our engineers are licensed in 46 states. Longstanding relationships with architects, developers, commercial and industrial clients, and renewable energy companies across the United States allow us to maximize efficiency and ensure reliable outcomes.

 **30GW** of Engineered Solar Plants
Largest Solar Portfolio in the United States

Renewable Energy Engineering—Services

Solar

Excellence in Solar Engineering —
On the forefront of solar technology
with hundreds of projects in
46 states and 5 countries.

Wind

Providing a full range of engineering
services from feasibility studies to
complete design and permitting.

Energy Storage

Powering the future with Battery Energy Storage Systems
(BESS) and amplifying the benefits of renewable energy
generation.

Substation

Blymyer Engineers delivers a full range of substation
design and engineering services for standalone or
microgrid substations.

EV Charging

Delivering end-to-end EV Charging
design and engineering with an
experienced team.

Engineering a more Sustainable World

Choose Blymyer Engineers for end-to-end renewable engineering services

Blymyer Engineers brings solar, storage, substation, EV charging, and wind projects from analysis and feasibility studies through engineering design and construction.

Our multidisciplinary firm includes electrical, mechanical, structural, environmental, and civil engineers versed in all aspects of renewable energy engineering.

Meticulous attention to detail and unparalleled customer service offer clients peace of mind and confidence in successful outcomes. Staying in the forefront of a rapidly growing and changing industry, Blymyer is creating a more sustainable world with technologically advanced solutions.

Utility-Scale Solar—Services

Ash Creek | Abbott, Texas
408.85 MW Solar | 34.5/345 kV Substation

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Feasibility studies
- Energy analysis/modeling
- Conceptual design
- Design development
- Cost estimates
- Construction documentation
- Project management
- Construction management
- Commissioning

THE VALUE OF VISION AND EXPERIENCE:

- Specialized knowledge
- Understanding of energy economics, including up-front and long-term costs
- Optimized design and highest-quality installation

Utility-Scale Solar (SAMPLE PROJECTS)

Taygete 1 & 2 | Pecos County, Texas
500 MW Solar

San Juan | Kirtland, New Mexico
200 MW Solar | 400 MWh Energy Storage

Prospero 1 & 2 | Andrews, Texas
550 MW Solar

Big Plain | Madison County, Ohio
196 MW Solar | 34.5/138 kV Substation

Harquahala | Tonopah, Arizona
450 MW Solar | 1.2 GWh Energy Storage

Eland | California City, California
200 MW Solar

Utility-Scale Solar (SAMPLE PROJECTS)

River Fork | Albion, Michigan
149 MW Solar | 34.5/138 kV Substation

Springbok I and II | Kern County, California
258 MW Solar

Franklin Solar | Rogerson, Idaho
100 MW Solar | 240 MWh Energy Storage

Mammoth North | Monterey, Indiana
400 MW Solar

Oberon 1 & 2 | California
500 MW Solar | 250 MWh Energy Storage

Muscle Shoals | Colbert County, Alabama
227 MW Solar | 34.5/161 kV Substation

Utility-Scale Solar (PARTIAL LIST)

Chimney Canyon	Arizona	618MW Solar	Electrical and structural engineering. Permitting assistance. Utility interconnection assistance. Construction phase support.	2026
Macadamia	North Carolina	484MW Solar 34.5/230kV, 562MVA Substation	Electrical and structural engineering. Substation design. Permitting assistance. Utility interconnection assistance. Construction phase support.	2026
Obsidian Solar Center	Oregon	400MW Solar	Electrical and structural engineering.	2026
Libra	Nevada	700MW Solar 2.8GWh Energy Storage	Electrical, structural, and civil engineering. BESS design. SCADA design. Permitting assistance. Utility interconnection assistance. Construction phase support.	2025
Big Rooter East	Texas	550MW Solar	Electrical and structural engineering. Permitting assistance. Utility interconnection assistance. Construction phase support.	2025
Big Rooter West	Texas	400MW Solar	Electrical and structural engineering. Permitting assistance. Utility interconnection assistance. Construction phase support.	2025
Snowflake	Arizona	475MW Solar 1.9GWh Energy Storage	Electrical engineering. BESS design.	2025
Tormes	Texas	355MW Solar 34.5/345kV, 420MVA Substation	Electrical and structural engineering. Substation design. SCADA design.	2025
Nightfall	Texas	180MW Solar 34.5/138kV, 222MVA Substation	Electrical and structural engineering. Substation design.	2025
El Dorado 2	Illinois	120MW Solar	Electrical and structural engineering.	2025
Pelican Jaw	California	440MW Solar 34.5/230kV, 600MVA Substation	Electrical and structural engineering. Substation design. SCADA design.	2025
Thousand Mile	Texas	300MW Solar	Electrical and structural engineering.	2024
Santa Teresa	New Mexico	150MW Solar 600MWh Energy Storage	Electrical and structural engineering. BESS design.	2024
Stillhouse	Texas	210MW Solar 34.5/345kV Substation	Electrical and structural engineering. Substation design. SCADA design.	2024
Carne	New Hampshire	130MW Solar 260MWh Energy Storage	Electrical and structural engineering.	2024
Cherry Valley	Arizona	135MW Solar 34.5/161kV Substation	Electrical and structural engineering. Substation design. SCADA design.	2024
Ash Creek	Texas	408.85MW Solar 34.5/345kV, 408.85MVA Substation	Electrical and structural engineering. Substation design.	2023

Utility-Scale Solar (PARTIAL LIST)

Harquahala	Arizona	450MW Solar 1.2GWh Energy Storage	Electrical and structural engineering. BESS design.	2023
Franklin	Idaho	100MW Solar 240MWh Energy Storage	Electrical and structural engineering. BESS design.	2023
Kiowa	Oklahoma	100MW Solar 34.5/138kV, 100MVA Substation	Electrical and structural engineering. Substation design.	2023
El Dorado	Illinois	159MW Solar 34.5/138kV, 360MVA Substation	Electrical and structural engineering. Substation design.	2023
San Juan	New Mexico	200MW Solar 400MWh Energy Storage	Electrical and structural engineering. BESS design.	2023
Eiffel	Texas	240MW Solar	Electrical and structural engineering.	2023
Big Plain	Ohio	196MW Solar 34.5/138kV, 196MVA Substation	Electrical and structural engineering. Substation design.	2023
Oberon 1 & 2	California	500MW Solar 1GWh Energy Storage	Electrical and structural engineering. BESS design.	2022
Solar Blue	California	250MW Solar 34.5/230kV, 250MVA Substation 900MWh Energy Storage	Electrical and structural engineering. Substation design. BESS design.	2022
Arica	California	263MW Solar 544MWh Energy Storage	Electrical and structural engineering. BESS design.	2022
Victory Pass	California	200MW Solar 34.5/230kV, 514MVA Substation 200MWh Energy Storage	Electrical and structural engineering. Substation design. BESS design.	2022
Jackpot	Idaho	120MW Solar	Electrical and structural engineering.	2022
Brazoria County	Texas	200MW Solar 34.5/138kV, 226.8MVA Substation	Electrical and structural engineering. Substation design.	2022
Atlanta Farms	Texas	200MW Solar	Electrical and structural engineering.	2022
Highland	Ohio	300MW Solar	Electrical and structural engineering.	2022
Bartonsville	Virginia	96MW Solar	Electrical and structural engineering.	2021
Riverfork	Michigan	149MW Solar	Electrical and structural engineering.	2021
Eland	California	200MW Solar	Electrical and structural engineering.	2021
Sandy Branch	Texas	230MW Solar 34.5/138kV, 151.2MVA Substation	Electrical and structural engineering. Substation design.	2021
Brazoria West	Texas	200MW Solar 34.5/138kV, 227.16MVA Substation	Electrical and structural engineering. Substation design.	2021
Big River	Illinois	80MW Solar	Electrical and structural engineering.	2021
Aquamarine	California	250MW Solar 34.5/230kV, 320MVA Substation	Electrical and structural engineering. Substation design.	2021

Utility-Scale Solar (PARTIAL LIST)

Prospero 1 & 2	Texas	550MW Solar	Electrical and structural engineering.	2021
Muscle Shoals	Alabama	227MW Solar 34.5/161kV, 252.4MVA Substation	Electrical and structural engineering. Substation design.	2021
Impact	Texas	200MW Solar	Electrical and structural engineering.	2020
Taygete 1 & 2	Texas	500MW Solar 34.5/2138kV, 277.2MVA Substation 1.5GWh Energy Storage	Electrical and structural engineering. Substation design. BESS design.	2020
Hunter	Utah	100MW Solar 34.5/138kV, 110MVA Substation	Electrical and structural engineering. Substation design.	2020
Prairie Wolf	Illinois	200MW Solar 34.5/138kV, 250MVA Substation	Electrical and structural engineering. Substation design.	2020
Cove Mountain	Utah	180MW Solar	Electrical and structural engineering.	2020
Wright	California	200MW Solar	Electrical and structural engineering.	2019
Sweetwater	Wyoming	80MW Solar	Electrical and structural engineering.	2019
Mount Signal 2	California	153MW Solar 34.5/230kV, 165MVA Substation	Electrical and structural engineering. Substation design.	2019
Bay Wa (4 sites)	North Carolina	46MW Solar	Electrical and structural engineering.	2017
Buckthorn Solar	Texas	150MW Solar	Electrical and structural engineering.	2017
Clenera Grand View Solar	Idaho	80MW Solar	Electrical and structural engineering.	2017
Gulf (3 sites)	Florida	123.75MW Solar	Electrical and structural engineering.	2017
North Star	Minnesota	100MW Solar	Electrical and structural engineering.	2016

Distributed-Generation Solar—Services

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Initial feasibility studies
- Energy modeling and analysis
- Conceptual design
- Design development
- Detailed cost estimates
- Construction documentation
- Permitting
- Project management
- Construction management
- Design/build
- Commissioning

Distributed-Generation Solar (SAMPLE PROJECTS)

Project Nexus | Stanislaus County, California
1.6 MW Solar | 800 kWh Energy Storage

California Institute of Technology
Pasadena, California | 1.4 MW Solar

Walmart | 7 locations | Central California
2.8 MW Solar

State Fund | 8 Sites | California
10.6 MW Solar

U.S. Veterans Administration Hospital
Florida and California | 5.7 MW Solar

U.S. Marine Corps Base Housing
Camp Lejeune, North Carolina | 5.4 MW Solar

Distributed-Generation Solar (SAMPLE PROJECTS)

**County of Shasta, California | 16 Sites
2.5 MW Solar**

**UC Davis West Village | Davis, California
340 kW Solar**

City of Brea, California | 2 MW Solar

**Energy Conservation Measures
City of San Jose, California**

**Hawaii Department of Education
4,500 kW Solar**

**Qatar Science & Technology Park
Doha, Qatar | 700 kW Solar**

Distributed-Generation Solar (PARTIAL LIST)

Petro Ontario	Ontario, California	400kW Solar 4MWh Energy Storage 6 EV Charging Stalls	Canopy mount	Electrical and structural engineering. BESS design. SCADA design. EV Charging system design. Permitting assistance. Construction phase support.	2025

Idyllwild Water District	Idyllwild, California	43kW Solar	Ground mount	Design consulting, installation and commissioning.	2005
Seley Citrus Ranch (Agricultural)	Borrego Springs, California	267kW Solar	Ground mount	Design consulting, installation and commissioning.	2004

DSA Solar—Services

Merritt College | Oakland, California
1.2 MW Solar

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Initial feasibility studies
- Energy modeling and analysis
- Conceptual design
- Design development
- Detailed cost estimates
- Construction documentation
- Permitting
- DSA approvals
- Project management
- Construction management
- Design/build
- Commissioning

MULTIDISCIPLINARY ENGINEERING SERVICES

Blymyer Engineers has designed over 60 MW of solar projects for California schools. Since 2008, Blymyer has installed prechecked canopies at over 300 school sites in California. Our 5th-generation, prechecked canopy design meets all current DSA requirements and offers you the following advantages:

- Rapid permitting
- Lower costs
- Design for all soil, seismic, and wind conditions
- Prechecks include options for T and L structure designs
- Flexibility to accommodate any available modules

DSA Solar (SAMPLE PROJECTS)

Pinole Valley High School | California
418 kW Solar

Lancaster Unified School District | California
5.5 MW Solar | 23 schools

San Jose Unified School District | California
7.2 MW Solar | 13 schools

Pittsburg Unified School District | California
4 MW Solar | 13 schools

DVC Community College	Pleasant Hill, California	1MW Solar	Canopy and ground mount	DSA permitting. Installation consulting. Electrical and structural engineering.	2007

Energy Storage—Services

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Feasibility studies
- Site assessments
- Conceptual design
- Design development
- Detailed electrical design
- Cost estimates
- Detailed structural design
- Construction/permitting
- Project management
- Construction management
- Commissioning process

Energy Storage (SAMPLE PROJECTS)

Harquahala | Tonopah, Arizona
1.2 GWh Energy Storage | 450 MW Solar

San Juan | Kirtland, New Mexico
400 MWh Energy Storage | 200 MW Solar

Franklin | Rogerson, Idaho
240 MWh Energy Storage | 100 MW Solar

Oberon 1 & 2 | California
250 MWh Energy Storage | 500 MW Solar

Project Nexus | Stanislaus County, California
800 kWh Energy Storage | 1.6 MW Solar

Chestnut | Kings County, California
135 MW Energy Storage | 150 MW Solar

Energy Storage (SAMPLE PROJECTS)

Santa Ana Energy Storage | California
40 MW/160 MWh Energy Storage

WattEV | Sacramento, California
5.5 MWh Energy Storage | 24.3 MWdc Solar
60 Stalls EV Charging | 69 kV Substation

Victory Pass & Arica | Desert Center, California
186 MWh Energy Storage | 463 MW Solar

WattEV | Bakersfield, California
3 MWh Energy Storage | 25 MW Solar
240-360 kW EV Charging

Mira Loma/Tesla | Ontario, California
20 MW/80 MWh Energy Storage

Agua Fria | Glendale, Arizona
25 MW/100 MWh Energy Storage

Energy Storage (PARTIAL LIST)

Libra	Mineral and Lyon County, Nevada	2.8GWh Energy Storage 700MW Solar	Electrical, structural, and civil engineering. BESS design. SCADA design. Permitting assistance. Utility interconnection assistance. Construction phase support.	2025
Bamburgh Group Modoc	Modoc County, Nevada	1.52GWh Energy Storage 400MW Solar	Electrical engineering. BESS design.	2025
Foxtail Flats	San Juan County, New Mexico	320MWh Energy Storage 170MW Solar	Electrical engineering. BESS design. Permitting assistance. Utility interconnection assistance. Construction phase support.	2025
Four Mile Mesa	San Juan County, New Mexico	400MWh Energy Storage 100MW Solar	Electrical engineering. BESS design. Permitting assistance. Utility interconnection assistance. Construction phase support.	2025
Cherry	King County, California	600MWh Energy Storage 135MW Solar	Electrical and structural engineering. BESS design.	2025
Snowflake	Navajo County, Arizona	1.9GWh Energy Storage 475MW Solar	Electrical and structural engineering. BESS design.	2025
Maricopa 1 & 2	Maricopa County, Arizona	2.2GWh Energy Storage 567MW Solar	Electrical and structural engineering. BESS design.	2024
Santa Teresa	Dona Ana County, New Mexico	600MWh Energy Storage 150MW Solar	Electrical and structural engineering. BESS design.	2024
Gaskell West	Kern County, California	86.5MWh Energy Storage	Electrical and structural engineering. BESS design.	2024
Carne	Luna County, New Mexico	260MWh Energy Storage 130MW Solar	Electrical and structural engineering. BESS design.	2024
Arrowleaf	Brawley, California	140MWh Energy Storage 42MW Solar	Electrical and structural engineering. BESS design.	2024
Azalea	Kern County, California	152MWH Energy Storage 60MW Solar 34.5/6kV, 78MVA Substation	Electrical and structural engineering. BESS design. Substation design.	2024
Superstition	Gilbert, Arizona	360MWh Energy Storage 90MW Solar	Electrical and structural engineering. BESS design.	2023
Stanton	Stanton, California	275.2 MWh Energy Storage 68.8MW Solar	Electrical and structural engineering. BESS design.	2023
San Juan	Kirtland, New Mexico	400MWh Energy Storage 200MW Solar	Electrical and structural engineering. BESS design.	2023
Oberon 1 & 2	Riverside County, California	1GWh Energy Storage 500MW Solar	Electrical and structural engineering. BESS design.	2023
Santa Ana	Santa Ana, California	160MWh Energy Storage 40MW Solar	Electrical and structural engineering. BESS design.	2023
Chestnut	Kings County, California	540MWh Energy Storage 150MW Solar	Electrical and structural engineering. BESS design.	2022

Energy Storage (PARTIAL LIST)

Solar Blue	Kings County, California	900MWh Energy Storage 250MW Solar 34.5/230kV, 250MVA Substation	Electrical and structural engineering. BESS design. Substation design.	2022
Avion	Pima County, Arizona	1MWh Energy Storage 15MW Solar	Electrical and structural engineering. BESS design.	2022
Bottleneck	Richgrove, California	376MWh Energy Storage 94MW Solar	Electrical and structural engineering. BESS design.	2022
Pomona II	Pomona, California	40MWh Energy Storage 20MW Solar	Electrical and structural engineering. BESS design.	2021
Tesla Glendale	Glendale, Arizona	100MWh Energy Storage 25MW Solar	Electrical and structural engineering. BESS design.	2021
Tesla Westminster	Westminster, Massachusetts	4.5MWh Energy Storage 2MW Solar	Electrical and structural engineering. BESS design.	2020
Tesla Vallecito	Carpinteria, California	40MWh Energy Storage 10MW Solar	Electrical and structural engineering. BESS design.	2020
Tesla Silverstrand	Camarillo, California	44MWh Energy Storage 11MW Solar	Electrical and structural engineering. BESS design.	2020
Tesla Long Beach	Long Beach, California	15.4MWh Energy Storage 2.56MW Solar	Electrical and structural engineering. BESS design.	2019
Irvine Company (4 sites)	Irvine, California	15.5MWh Energy Storage	Electrical and structural engineering. BESS design.	2019
SK Hart	Newport Beach, California	3.7MWh Energy Storage 910kW Solar	Electrical and structural engineering. BESS design.	2019
Tesla Newport Gateway (2 systems)	Irvine, California	6.72MWh Energy Storage 1.0MW Solar	Electrical and structural engineering. BESS design.	2018
Tesla Morgan Stanley	San Francisco, California	1.26MWh Energy Storage 500kW Solar	Electrical and structural engineering. BESS design.	2018
Tesla Costa Mesa	Costa Mesa, California	6.51MWh Energy Storage 1MW Solar	Electrical and structural engineering. BESS design.	2018
Tesla Mira Loma	Ontario, California	80MWh Energy Storage 2 MW Solar	Electrical and structural engineering. BESS design.	2017
Tesla Port Hueneme	Port Hueneme, California	2MWh Energy Storage 1MW Solar	Electrical and structural engineering. BESS design.	2015
Tesla CSU Long Beach	Long Beach, California	2MWh Energy Storage 1MW Solar	Electrical and structural engineering. BESS design.	2015
Tesla Lathrop	Lathrop, California	4MWh Energy Storage 2MW Solar	Electrical and structural engineering. BESS design.	2015

EV Charging—Services

WattEV | Bakersfield, California

240-360 kW EV Charging | 25 MW Solar | 3 MWh Energy Storage

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Initial feasibility studies
- Energy modeling and analysis
- Conceptual design
- Design development
- Detailed cost estimates
- Construction documentation
- Permitting
- Project management
- Construction management
- Design/build
- Commissioning

EV Charging Stations (SAMPLE PROJECTS)

MARS Energy | Santa Rosa, California
7 Stalls EV Charging | 3,836.7 kWdc Solar
3.852 kWh Energy Storage

SiteLogiq | Camarillo, California (3 sites)
12 Stalls EV Charging | 254.81 kWdc Solar
406 kWh Energy Storage

EVgo Pacific Ave | San Francisco, California
24 Stalls EV Charging

Tesla City Center | San Francisco, California
40 Stalls EV Charging

Tesla Firebaugh | Firebaugh, California
56 Stalls EV Charging

Tesla Gateway 101 | East Palo Alto, California
20 Stalls EV Charging

EV Charging Station (PARTIAL LIST)

Rivian	California	276 EV Charging Stalls	Electrical and structural engineering.	2026
Rivian	Nevada	12 EV Charging Stalls	Electrical and structural engineering.	2026
EVgo	California	40 EV Charging Stalls	Electrical and structural engineering.	2026
WattEv	California	20 EV Charging Stalls	Electrical and structural engineering.	2026
Rivian	California	388 EV Charging Stalls	Electrical and structural engineering.	2025
EVgo	California	124 EV Charging Stalls	Electrical and structural engineering.	2025
EVgo	California	60 EV Charging Stalls	Electrical and structural engineering.	2024
Forum Energy Partners	California	28 EV Charging Stalls	Electrical engineering.	2024
WattEv (Truck charging facility)	California	30 EV Charging Stalls	Electrical and structural engineering.	2024
EVgo	California	70 EV Charging Stalls	Electrical and structural engineering.	2023
EVgo	California	360 EV Charging Stalls	Electrical and structural engineering.	2022
EVgo	Texas	18 EV Charging Stalls	Electrical and structural engineering.	2022
EVgo	Arizona	42 EV Charging Stalls	Electrical and structural engineering.	2022
EVgo	Oregon	24 EV Charging Stalls	Electrical and structural engineering.	2022
EVgo	Washington	72 EV Charging Stalls	Electrical and structural engineering.	2022
Tesla	California	36 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2021
Tesla	Hawaii	24 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2021
EVgo	California	350 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2021
EVgo	Colorado	11 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2021
EVgo	Washington	16 EV Charging Stalls	Electrical and structural engineering.	2021
Rivian	Oregon	18 EV Charging Stalls	Electrical and structural engineering.	2021
Rivian	Arizona	12 EV Charging Stalls	Electrical and structural engineering.	2021
Rivian	California	70 EV Charging Stalls	Electrical and structural engineering.	2021
EVgo	California	231 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2021
EVgo	Texas	22 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2021
Tesla	California	108 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2020
EVgo	California	131 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2020
Tesla	Hawaii	18 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2019
Tesla	California	184 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2019
EVgo	California	66 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2019
Tesla	California	256 EV Charging Stalls	Electrical and structural engineering. Utility coordination.	2018

Pioneer Solar | Adams County, Colorado
88.8 MVA, 34.5/115 kV Substation

BLYMYER ENGINEERS' SERVICES INCLUDE:

- Feasibility studies
- Site assessments
- Conceptual design
- Design development
- Detailed electrical design
- Cost estimates
- Detailed structural design
- Construction/permitting
- Project management
- Construction management
- Commissioning process

Substations (SAMPLE PROJECTS)

Ash Creek | Abbott, Texas
34.5/345 kV Substation | 408.85 MW Solar

Muscle Shoals | Colbert County, Alabama
34.5/161 kV Substation | 227 MW Solar

Kiowa County, Oklahoma
34.5/138 kV Substation | 100 MW Solar

Big Plain | Madison County, Ohio
34.5/138 kV Substation | 196 MW Solar

Chambers County, Alabama
34.5/115 kV, 90 MVA Substation
72 MW Solar

Chestnut | Kings County, California
230 kV, 200 MVA Substation
150 MW Solar | 135 MW Energy Storage

Substations (SAMPLE PROJECTS)

Central 40 | California
52.5 MVA, 34.5/115 kV Substation

Aquamarine | Stratford, California
320 MVA, 34.5/230 kV Substation

Mount Signal 2 Solar | California
165 MVA, 34.5/230 kV Substation

Pioneer Solar | Colorado
88.8 MVA, 34.5/115 kV Substation

WattEV

WattEV | Sacramento, California
69 kV Substation | 60 Stalls EV Charging
5.5 MWh Energy Storage | 24.3 MWdc Solar

Victory Pass & Arica | Desert Center, California
34.5/230 kV, 514 MVA Substation
463 MW Solar | 186 MWh Energy Storage

Substations (PARTIAL LIST)

Macadamia	North Carolina	34.5/230kV, 562.5MVA Substation 484MW Solar	Electrical and structural engineering. Substation design. Permitting assistance. Utility interconnection assistance. Construction phase support.	2026

Blymyer Engineers — Director of Engineering

From the Director of Engineering

Step into the future of renewable energy with our pioneering company. At Blymyer Engineers, we have revolutionized the renewable landscape, enabling businesses and communities worldwide to harness the power of the sun and wind for a sustainable and clean energy future.

Our team of engineers are industry experts that bring a wealth of knowledge and experience to every project. We stay abreast of the latest technological advancements, incorporating cutting-edge innovations into our designs to enhance efficiency, streamline operations, and maximize energy output. When you partner with us, you gain access to a wealth of expertise that will give you a competitive edge in the market.

Our impressive portfolio of 30GW of engineered plants is a testament to our ability to deliver large-scale projects that exceed expectations in terms of efficiency, reliability, and environmental impact. We have successfully completed projects across diverse industries, from commercial and industrial installations to utility-scale power plants. Our clients trust us to deliver results that exceed their expectations, and we take pride in forging long-lasting partnerships built on trust, reliability, and shared success.

So, if you're ready to join the renewable revolution and unlock the full potential of renewable energy, look no further than Blymyer Engineers. With our unrivaled experience, innovative solutions, and dedication to sustainability, we are the ideal partner to help you harness the power of the sun and wind and drive your organization towards a brighter and greener future. Get in touch with us today and let's embark on this transformative journey together.

Greg Mazur, P.E.
Director of Engineering

Founded in 1961, Blymyer Engineers has over 65 years of experience that is dedicated to your success.

Optimizing design for fast, economical installation.

We work around the clock for you.
